I am tired of mine/our choices of what type of energy sources I can choose to heat, heat water and cook in my house. You are currently trying to do this to commercial buildings. We the citizen will be next. We have the freedom of choice. This is not a dictatorship. We have not had the right to vote on this. Your circumventing democracy. Your panel is not even elected. Shame on you for letting this happen. You must not approve this one way plan
Stop now!
